Art Unit: 2621

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claim 1 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 19 of U.S. Patent No. 6,721,447. Although the conflicting claims are not identical, they are not patentably distinct from each other because the patent claim 19 includes all limitations of claim 1 in the present application (i.e., claim 19 of the patent comprises a step of "expressing a reliability of a representative color value as an information of each image region together with a representative color which represents an image region" which is the only step required by claim 1 of the present application).

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Gast et al [U. S. Patent No. 4,414,635].

Gast et al teach expressing a reliability of representative color as color information of an image region (col. 7, lines 46 – col. 8, line 29; i.e., d_2 corresponds to a reliability of

Art Unit: 2621

representative color "2") and a representative color value which represent the image region (col. 6, line 48 - col. 7, line 32).

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Hong et al disclose the state of the art of color image processing.
